                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Sequence 44, Application US/10476570
Sequence 44, Application US/10476570
Sequence 44, Application No. U220040170644A1
GENERAL INFORMATION:
APPLICANT: COMMISSARIAT A L'ENERGIE ATOMIQUE
APPLICANT: INSTITUT NATIONAL DE LA SANTE ET DE LA RECHERCHE MEDICALE
APPLICANT: BOUNGAULT-VILLADA, Isabelle
APPLICANT: BOUNGALLE-WARATILLE, Sandra
APPLICANT: GUILLET, Jean-Gerard
TITLE OF INVENTION: Dapillomavirus proteins and uses thereof
FILE REPRENCE: 45636-5071-US
CURRENT APPLICATION NUMBER: US/10/476,570
CURRENT PILING DATE: 2003-11-04
PRIOR APPLICATION NUMBER: PCT/FR02/01533
PRIOR APPLICATION NUMBER: PCT/FR02/01533
PRIOR APPLICATION NUMBER: PCT/FR02/01533
NESULT 2

US-10-938-249-513

Sequence 513. Application US/10938249

Publication No. US20050037969A1

GENERAL INCEMENTION:
APPLICANT: Lu. Peter S.
APPLICANT: Rabinowitz, Joshua D.
APPLICANT: Schwatzer, Johanna D.
APPLICANT: Achor Vita Corporation

TITLE OF INVENTION: Compositions Comprising Human Papilloma Virus Proteins
TITLE OF INVENTION: and Fusion Proteins Adjuvanted with a CpG Oligonucleotide
FILE REPERENCE: B45124
CURRENT APPLICATION NUMBER: US/10/899,771
CURRENT FILING DATE: 2004-07-27
PRIOR FILING DATE: 2004-07-27
PRIOR FILING DATE: 1909-12-18
PRIOR FILING DATE: 1998-12-18
PRIOR FILING DATE: 1998-12-18
PRIOR FILING DATE: 1998-12-18
PRIOR FILING DATE: 1998-12-24
NUMBER: OF SEQ ID NOS: 28
SOFTWARE: FastSEQ for Windows Version 3.0
                                                                                                                                                                                                                                                                                                                                                                                                              FEATURE:
OTHER INFORMATION: Chimaeric protein (protein D from Haemophilius
OTHER INFORMATION: influenzae B and E6 from Human papilloma virus type
OTHER INFORMATION: 16)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Gaps

Patent No. 5932412
GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: DILLNER, JOAKIM
APPLICANT: CHENG, HWEE-MING
TITLE OF INVENTION: SYNTHETIC PEPTIDES OF HUMAN
TITLE OF INVENTION: DARLICOMAVIRUS 1, 5, 6, 8,
TITLE OF INVENTION: 11, 16, 18, 31, 33 AND 56,
TITLE OF INVENTION: USEFUL IN IMMUNASSAY FOR
TITLE OF INVENTION: DIAGNOSTIC PURPOSES
NUMBER OF SEQUENCES: 193
CORRESPONDENCE ADDRESS:

Application US/08316239B

Sequence 3. Application US/08316239B

Patent No. 5679509

GENERAL INFORMATION:

APPLICANT: Wheeler, Cosette M.

APPLICANT: Wheeler, Cheryl A.

TITLE OF INVENTION: Distinguishing a Subset of HPV that is Associated with an TITLE OF INVENTION: Increased Risk of Developing Cervical Dysplasia and TITLE OF INVENTION: Cervical Cancer
NUMBER OF SEQUENCES: 4

CORRESPONDENCE ADDRESS:

ADDRESSE: Jagtiani & Associates
STREET: Geltery Way Court
CITY: Centreville
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    ö

Sequence 2. Application US/09980523A

Patent No. 6783763

GENERAL INFORMATION:

APPLICANT: CHOPPIN, JEANNINE

APPLICANT: GUILLET, JEAN-GERARD

APPLICANT: COUNTAN, FRANCINE

APPLICANT: COUNTAN, FRANCINE

TITLE OF INVENTION: POLYEPITOPIC PROTEIN FRAGMENTS OF THE E6 AND E7

TITLE OF INVENTION: PROTEINS OF HPV, THEIR PRODUCTION AND THEIR USE

TITLE OF INVENTION: PRATICULARLY IN VACCINATION

FILE REFERENCE: WOBL AO INS

CURRENT APPLICATION NUMBER: US/09/980,523A

CURRENT APPLICATION NUMBER: E7/FR00/01513

PRIOR FILING DATE: 2000-05-31

PRIOR FILING DATE: 2000-05-31

PRIOR FILING DATE: 1999-06-03

NUMBER OF SEQ ID NOS: 24

Patent No. 6306397

GENERAL INFORMATION:

APPLICANT: EDWARMATION:

APPLICANT: EDWARDS, Stirling John

APPLICANT: EDWARDS, Stirling John

APPLICANT: WEBB, Bilzabeth Ann

APPLICANT: FRAZER, Ian

TITLE OF INVENTION: VARIANTS OF HUMAN PAPILLOMA VIRUS ANTIGENS

FILE REFERENCE: 017227/0148

CURRENT APPLICATION NUMBER: US/09/359,382

CURRENT FILING DATE: 1999-07-23

EARLIER APPLICATION NUMBER: US 08/860,165

EARLIER PEPLICATION NUMBER: PCT/AU95/00868

EARLIER PEPLICATION NUMBER: PCT/AU95/00868

EARLIER PEPLICATION NUMBER: AU PNO157/94

EARLIER FILING DATE: 1994-12-20

NUMBER OF SEQ ID NOS: 2.0

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Sequence 53, Application US/08934915
; Sequence 53, Application US/08934915
; Patent No. 2923412
; GENERAL INFORMATION:
   APPLICANT: DILLNER, LENA
APPLICANT: DILLNER, LENA
TITLE OF INVENTION: SYNTHETIC PEPTIDES OF HUMAN
TITLE OF INVENTION: SYNTHETIC PEPTIDES OF HUMAN
TITLE OF INVENTION: DADILLOMAVIRUS 1, 5, 6, 8,
TITLE OF INVENTION: USEFUL IN IMMUNOASSAY FOR
TITLE OF INVENTION: DIAGNOSTIC PURPOSES
NUMBER OF SEQUENCES: 193
CORRESPONDENCE ADDRESS:
ADDRESSEE: MASON & ASSOCIATES, P.A.
STREET: 17757 U.S. HWY. 19 NORTH, SUITE 500
CITY: CLEARWATER
STATE: LUCKIDA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             COUNTRY: U.S.A.
